Style + Performance + Service = The Fypon Advantage

Fypon gives design and construction professionals an edge over all other interior and exterior design building materials. Fypon marries style and performance with one of the industry's largest product offerings and best customer service to give our customers a true competitive edge.

FYPON STYLE

Fypon is the recognized leader in polyurethane product design, innovation and molding technology. From old world style to classic modern design, Fypon offers the largest and most architecturally correct styles and designs of moulding and trim.

- Architecturally correct and historically accurate product styles and designs
- Our products are designed to capture the texture, patterns and deep shadow lines of classic building materials
- A distinctive look and personality to complement any home design for maximum appeal

FYPON PERFORMANCE

Only Fypon engineers consistent quality and long lasting performance into every product we make, today and tomorrow. From our popular trim and mouldings, balustrade systems and porch posts, each product is manufactured by experts in polyurethane molding technology. All Fypon building products:

- Are easy to install with no special tools or extra labor necessary
- Deliver consistent workmanship and product quality
- Feature low maintenance
- Provide weather and moisture resistance
- Come stain or paint ready
- Resists insects and won't warp, crack or split

FYPON SERVICE

From one leader to another, building professionals trust Fypon to deliver on the jobsite and to the bottom line.

- Fypon provides architects and builders with custom drawings and marketing support for blue prints and model homes
- Receive extensive builder support including an industry first quote package program with quantity pricing available at CPS@fypon.com
- We provide installation FAQ (frequently asked questions) and support from master craftsmen
- Plus custom design services for historical restorations, replicas or any unique profile that fits your home or commercial application available at CPS@fypon.com

UNDERSTANDING THE FYPON CATALOG AND PRODUCTS

Browse our polyurethane catalog, consisting of smooth products, column wraps and QuickRail that will add more design elements and distinction to your next project. Trim, gables, pediments, crossheads, corbels, rafter tails and so much more. Fypon products offer a unique way to enhance the architectural style of your home that create harmony through historically accurate and detailed products that bring out the best in any home. In this catalog you will find:

- Sizing for each part – height, width, length and projection
- Detailed drawings
- Part numbers
- Beauty images that offer great ideas for many of our products

CUTTING & MILLING

Fypon polyurethane products can be cut and trimmed with standard woodworking tools.

- Table saws, circular saws, jig saws, band saws and miter saws will give you excellent results during the installation process.
- Trimming product will remove smooth finish and create an exposed polyurethane edge. This edge must be finished with paint or stain to protect the exposed polyurethane from discoloration from the sun.

For our complete product offering, please visit www.fypon.com.

FYPON
Where style meets performance

Exceptional Entrances

Window & Door Trim

Adding Fypon® window and door trim takes the look of a home from ordinary to extraordinary. Many pieces are designed to work together, and some can even be ordered moulded as one piece to further speed installation. From pilasters, pediments and crossheads, to arches and panels, our architectural options easily enhance a home's design. For installation and finishing instructions, please visit www.fypon.com.

How to Use This Section

The products in this section of the catalog are organized by size, from smallest to largest. Where applicable, part numbers are shown for fabricated products with attached accessories, and matching unattached accessories are referenced or shown with the product.

How to Order

Window Trim

To order window trim, first measure the window unit to be trimmed. Next choose the desired products and accessories to complete the look.

Door Trim & Entrance Systems

When ordering door trim, first measure the door unit to be trimmed. The unit can be measured with or without brick mould; however, the brick mould is essential when using a storm door. Next choose the desired pilaster style and size. Finally, choose a pediment or crosshead that is wide enough to span the opening plus the brick mould and pilasters (see example). Add desired accessories to complete the look.

Window & Door Trim Accessories

Keystones, dentil trim, trim strip and bottom trim accessories are available attached to standard products as fabricated products. Keystones can also be ordered as unattached accessories by listing the line item on your order.

Fabricated & Custom Products

Throughout this section, you will see fabricated products with attached accessories that have specific part numbers. To order a fabricated product shown in this catalog, place your order using the part number shown. Additional fabricated options may be available, including additional sizes and routing options.

Fypon offers architects and builders custom design services for historical restorations, replicas or any unique profile that fits your project. You can also receive an industry first quote package with quantity pricing. For either of these service contact CPS@fypon.com or call 855-397-6647.

FYPON
Where style meets performance

Details, Details

Mouldings

Whether your project calls for delicate Florentine trim, massive cornice mouldings, or anything in between, we offer a variety of beautiful options that range from simple to ornate. Our portfolio of tasteful, inspired styles is available in a range of sizes and combinations, so you can boost a home's character — and the homeowner's satisfaction. For installation and finishing instructions, please visit www.fypon.com.

How to Use This Section

The products in this section of the catalog are organized by architectural style. You can find a variety of products to match the aesthetics of almost any application conveniently grouped together. Where applicable, groups of mouldings are further sorted by height, from smallest to largest.

How to Order

Mouldings

First choose the product that best fits your application. The large variety of sizes and styles can be applied to any home. Mouldings can be used individually or combined to create a new and distinctive look.

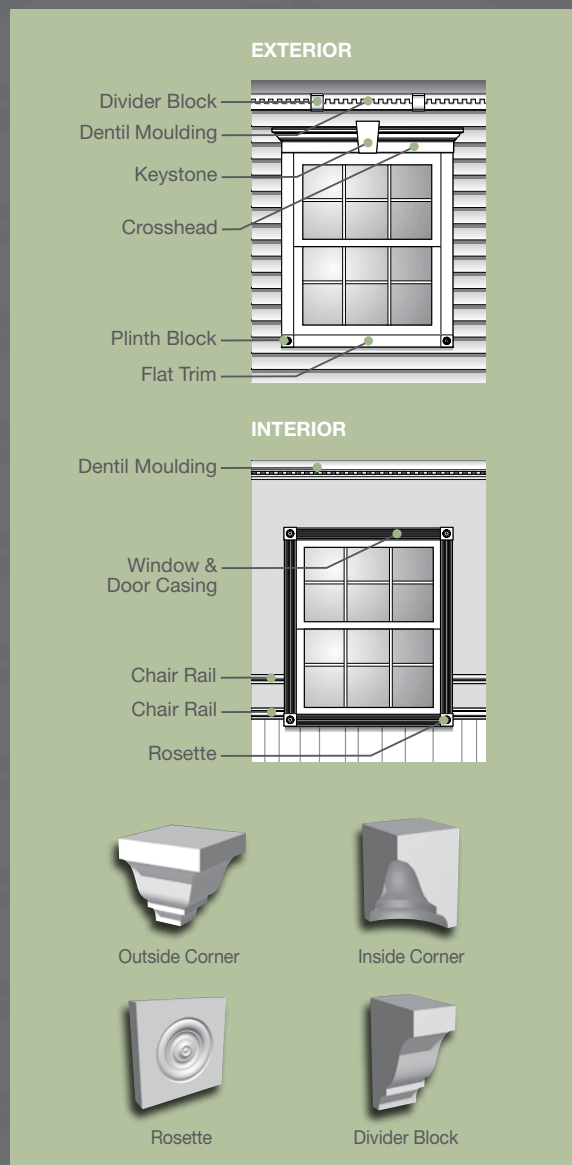

Moulding Accessories

The accessories shown here are available to help make moulding installations quick and easy. Inside and outside corners eliminate the hassle of figuring complex miter cuts. Divider blocks and rosettes can be used between moulding lengths to eliminate the need for patching to create smooth seams. All moulding accessories are unattached and must be ordered separately. Refer to page 84-85 for moulding accessories.

Fabricated & Custom Products

Throughout this section, you will see fabricated products with attached accessories that have specific part numbers. To order a fabricated product shown in this catalog, place your order using the part number shown. Additional fabricated options may be available, including additional sizes and routing options.

Fypon offers architects and builders custom design services for historical restorations, replicas or any unique profile that fits your project. You can also receive an industry first quote package with quantity pricing. For either of these service contact CPS@fypon.com or call 855-397-6647.

Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 184 to order Loctite® PL Premium® Adhesive.*

Table & Blade Angles

For recommended table and blade angles for mitering 90° corners, please visit the product support section at www.fypon.com.

* Loctite® PL Premium® is owned by Henkel Corporation.

Always consult the local building code authority to determine suitability of products to meet specific project requirements.

Images are representative of style, actual product will vary by size.

FYPON
Where style meets performance

Defining Design

Decorative Millwork

For the ultimate finishing touch, decorative millwork is the perfect choice for both interior and exterior applications. Fypon craftsmanship is evident in every exquisite detail. From brackets, corbels and gable pediments to niches, ceiling medallions and domes, our collection of architecturally accurate decorative millwork will expand your design possibilities for a room — or an entire home. For installation and finishing instructions, please visit www.fypon.com.

How to Use This Section

The products in this section of the catalog are organized by architectural style. You can find a variety of products to match the aesthetics of almost any application conveniently grouped together. Where applicable, groupings of brackets, corbels and dentil blocks are further sorted by height, from smallest to largest.

How to Order

Decorative Millwork

The first step when ordering decorative millwork is to determine the type of product needed. Then find the proper size for your specific application by measuring the width and height.

Decorative Millwork Accessories

Some decorative millwork products have accessories available or are an accessory to another product. All decorative millwork accessories are unattached and must be ordered separately.

Fabricated & Custom Products

Throughout this section, you will see fabricated products with attached accessories that have specific part numbers. To order a fabricated product shown in this catalog, place your order using the part number shown. Additional fabricated options may be available, including additional sizes and routing options.

Fypon offers architects and builders custom design services for historical restorations, replicas or any unique profile that fits your project. You can also receive an industry first quote package with quantity pricing. For either of these service contact CPS@fypon.com or call 855-397-6647.

Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 184 to order Loctite® PL Premium® Adhesive.*

* Loctite® PL Premium® is owned by Henkel Corporation.

Always consult the local building code authority to determine suitability of products to meet specific project requirements.

Images are representative of style, actual product will vary by size.

FYPON
Where style meets performance

A Fresh Look

Louvers & Gable Vents

Louvers have been a useful design accent for centuries. For today's homes, Fypon offers an incredible variety of decorative (non-venting) and functional (venting) louvers to fit most architectural styles. Decorative louvers have a solid, one-piece design that does not allow air to pass through. Functional louvers are designed to provide additional ventilation, with angled slats to help protect interiors from the elements. The inside of the functional louver has a corrosion-resistant screen that helps keep insects out while allowing airflow between the slats. Accessory pieces, such as flat trim and keystones, are available for most louver styles to add another beautiful touch. For installation and finishing instructions, please visit www.fypon.com.

How to Use This Section

The products in this section of the catalog are organized by louver style followed by matching trim. Where applicable, matching keystones are referenced for each louver and trim piece.

How to Order

Louvers

The first step when ordering a louver is to find the proper size for your specific application by measuring the width and height. Then find the louver you need to order by locating your desired style with corresponding measurements on the following pages.

Functional Louvers**

If you are ordering a functional louver, you should order a louver that is approximately 2" larger than your rough opening on all sides of the louver. This will allow you to attach the louver to the substrate through the brick mould edge.

Louver Accessories

Keystones and trim are available pre-attached to standard products as fabricated items. Keystones and trim can also be ordered as unattached accessories by listing the matching part number as a separate line item on your order.

Fabricated & Custom Products

Throughout this section, you will see fabricated products with attached accessories that have specific part numbers. To order a fabricated product shown in this catalog, place your order using the part number shown. Additional fabricated options may be available, including additional sizes and routing options.

Fypon offers architects and builders custom design services for historical restorations, replicas or any unique profile that fits your project. You can also receive an industry first quote package with quantity pricing. For either of these service contact CPS@fypon.com or call 855-397-6647.

FYPON
Where style meets performance

Sophisticated Spaces

Balustrade Systems

Transform any ordinary porch, patio or balcony into an impressive outdoor living area with our balustrade systems. The distinctive styles and sizes available make these systems an eye-catching accent for many home designs. Fypon balustrades are made from corrosion-resistant parts that require little maintenance. Most fasteners remain totally hidden to provide a clean, classic appearance from any view. Made of the same durable polyurethane material featured in all our products, most balustrade parts are also structurally reinforced. For installation and finishing instructions, please visit www.fypon.com.

How to Use This Section

The products in this section of the catalog are organized by style and then size. Once you determine the style of balustrade system desired, you can find the right size for your project with all the parts and accessories needed to complete the system, conveniently grouped together.

How to Order

Balustrade Systems**

Fypon® smooth balustrades are available in three systems: 5", 7" and 12". This size designates the width of the top and bottom rail. In addition to these three sizes, we offer a stone-textured system, which has a 6" wide top and bottom rail.

Planning Your Layout

Balusters

If you are using baluster panels, determine how many of them you wish to use first, then fill in the remaining space between the panels and newels with balusters. The maximum center-to-center distance between panels, balusters and newels should not allow a 4" ball to pass through at any point.

For each baluster, we have noted a center spacing dimension. This is the maximum center-to-center distance between balusters that does not allow a 4" ball to pass through at any point. The number of balusters you need can be found by dividing the rail span, in inches, by the center spacing dimension shown under each part.

NOTE: When dividing gives you a fractional result, always round up to the next whole number as shown in the example.

Rail Installation Kits

Each rail section (span between two newel posts) will require two rail installation kits. Rail installation kits will connect both ends of one rail to a newel post.

NOTE: Fypon rail installation kits will not work on stair applications. Top and bottom rails do not come pre-drilled.

Newel Posts

Each newel post will require one newel post installation kit (NPK) to anchor the base of the post, as well as any post tops, balls or trim collars desired.

Baluster Example

Ball →

4"

↑

Less Than 4"

BAL3X20CC –
Requires 5" on
center spacing

Rail Span ÷ Center Spacing =
No. of Balusters Needed

96" ÷ 5" = 19.2

(Round up to 20)

Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 184 to order Loctite® PL Premium® Adhesive.*

Balustrade System Accessories

Balustrade system accessories are available to help achieve your desired look. All balustrade accessories are unattached and must be ordered separately.

Columns and Porch Posts

A variety of structural post options are available to customize your balustrade system. Choose from structural porch posts or structural columns in the Porch Posts, Columns and Post Wrap section, beginning on page 158.

NOTE: When using porch posts with any railing system, make sure that the base height of the post can accommodate the overall height of your railing system.

Fabricated & Custom Products

Throughout this section, you will see fabricated products with attached accessories that have specific part numbers. To order a fabricated product shown in this catalog, place your order using the part number shown. Additional fabricated options may be available, including additional sizes and routing options.

Fypon offers architects and builders custom design services for historical restorations, replicas or any unique profile that fits your project. You can also receive an industry first quote package with quantity pricing. For either of these service contact CPS@fypon.com or call 855-397-6647.

* Loctite® PL Premium® is owned by Henkel Corporation.

** Always consult the local building code authority to determine suitability of products to meet specific project requirements.

Easy Elegance

Porch Posts, Columns & Wraps

Fypon® structural porch posts and columns provide the perfect combination of charm and strength. Our porch posts and columns are designed to be beautiful, as well as durable, with high-density polyurethane construction and structural reinforcement. And if you've already met the structural requirements of your project, Fypon decorative wraps can add a refined finishing touch. They install easily around an existing structural support, so you can add the appeal of decorative porch posts and columns near the end of your project. For installation and finishing instructions, please visit www.fypon.com.

How to Use This Section

The products in this section of the catalog are organized by style. Where applicable, matching caps and bases are shown with the product.

How to Order

The first step is to determine whether you need load-bearing porch posts and columns, or a decorative wrap to conceal an existing structural post.

Structural Porch Posts & Columns**

Structural porch posts and columns are reinforced and have load-bearing capacities as noted. Installation hardware is included. Simply choose the style of column or porch post desired in a height that is equal to or slightly larger than the required height. Porch posts and columns can be trimmed to various lengths without affecting load rating. Be sure to order the appropriate quantity of porch posts and columns to adequately support the weight of the load they will carry.

Decorative Wraps

Decorative wraps are non-structural and simply wrap an existing 4" x 4" treated wood post or other structural support. The decorative post wrap shown in this section is a 2-piece kit that includes 3-sided wrap and backer. We also carry a full line of PVC column wraps. For our PVC Catalog, please visit www.fypon.com.

Column & Wrap Accessories

Caps and bases are available as decorative accessories to help you achieve your desired look. These accessories are unattached and must be ordered separately.

Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 184 to order Loctite® PL Premium® Adhesive.*

* Loctite® PL Premium® is owned by Henkel Corporation.

** Always consult the local building code authority to determine suitability of products to meet specific project requirements.

Images are representative of style, actual product will vary by size.

FYPON
Where style meets performance

Coverage with Character

PVC Column Wraps

Once you've met the structural requirements of your project, Fypon® PVC column wraps can add an elegant finishing touch. Designed to install easily around an existing structural support, Fypon column wraps allow you to add the sophistication of traditional columns near the end of your project. So whether you need to add character to a new job or cover an outdated design, our column wraps offer many options for creating curb appeal. For installation instructions, please visit www.fypon.com.

How to Use This Section

For ease of use, the product groupings in this section of the catalog are organized by size, from smallest to largest. Where applicable, special order options are referenced with the product. Each product chart includes product images, dimensional data and part numbers to help specify, source and sell Fypon® PVC column wraps.

How to Order

PVC Column Wraps**

PVC column wraps are non-structural and simply wrap around an existing 4"x4" treated wood post or other structural support. Column wraps come in a complete kit that includes the shaft, cap, base, installation cleats, hardware, installation instructions and a tube of adhesive. Choose between various tapered and non-tapered styles with a height that meets or exceeds your height requirement. Plain column wraps can be trimmed to any height, and all other styles are trimmable from the bottom of the shaft up to 3".

PVC Column Wrap Accessories

Non-tapered column wraps come with the box cap and base. Tapered column wraps come with the Craftsman cap and base. Eight additional cap and base styles are available and can be special ordered separately. Simply choose a style and specify the type (tapered or non-tapered) and the nominal size of the column wrap you are matching. Most of the caps and bases are constructed of PVC and ship in four separate pieces with pre-mitered corners, unless otherwise noted.

Special Order Products

Some products shown in this catalog include special order options. This means the product is available in additional sizes or with additional accessories. Throughout this section, special order part numbers are marked with an asterisk (*). Where applicable, additional special order options are listed with the product.

Flexible Positioning PVC Column Wraps

Fypon column wraps allow for flexibility in positioning. The design features installation cleats on the exterior of the shaft, providing ample room around the support post. This allows for positioning adjustments to align several columns in a row or to allow for positioning close to the porch edge. Also, because the column wrap does not come in contact with the structural post, the integrity of the wrap is not dependent on the support. If the structural post starts to twist or warp, the column wrap will not be affected.

**Flexible positioning
around support post**

Before you order, you'll want to measure to make sure you have enough clear distance from the support post to the edge of the porch. The needed space is dependent on the style of column. You will need more space for tapered columns than non-tapered due to the larger base.

Allow adequate distance when choosing wrap width

** Always consult the local building code authority to determine suitability of products to meet specific project requirements.

Images are representative of style, actual product will vary by size.

BY FYPON
SYNTHETIC RAILING SYSTEM

Polish with a Purpose

QuickRail® Systems

Beautiful railings are made more durable, thanks to our special manufacturing process. They are virtually maintenance free, and resist decay, warping, fading, chipping, splintering and rust. And simple, step-by-step installation instructions help ensure all QuickRail products live up to their name. For installation instructions, please visit www.fypon.com. For installation instructions, please visit www.fypon.com.

How to Use This Section

For ease of use, the product groupings in this section of the catalog are organized by size, from smallest to largest, where applicable. Each product chart includes product images, dimensional data and part numbers to help specify, source and sell Fypon® QuickRail® synthetic railing systems.

How to Order

QuickRail® Systems

QuickRail rail kits are available for both straight and stair applications. Each kit includes a deluxe top rail, a flat bottom rail, spindles, a crush block, brackets, bracket covers and the necessary screws for fast installation. Rail kits can be attached to a wall, round column, newel post or porch post.

NOTE: QuickRail stair rail kits cannot be attached to round columns or 45° post applications.

First, plan your layout, as shown here, by determining the size and configuration of your porch, including any stairs. The most important step to building your order is creating an accurate layout. Check local building codes to determine minimum guardrail height, maximum rail span and structural post requirements for your area. Determine the number of rail and post kits you need to accommodate your layout.

Next, choose spindle style. Then find the part number of the rail kit that meets your style, length and height requirements.

Finally, determine size and style of any accessories needed to achieve the desired look.

QuickRail® System Accessories

A variety of accessories are available to create your own unique system, including post kits, post sleeves, gate kits, porch posts and grab rails. If you have an application where additional or unique connections are required, bracket and adapter kits are sold separately. Individual components are also sold separately.

Special Order Products

Some products shown in this catalog include special order options. This means the product is available in additional sizes or with additional accessories. Throughout this section, special order part numbers are marked with an asterisk (*).

Building Code Compliance*

QuickRail products are building code compliant when installed on structural surfaces no more than 30" above ground. The 8' and 10' rail kits include a top rail aluminum insert that must be used in any installation. The 6' rail kits do not require an insert. In applications above 30", only rail lengths of 10' or less mounted between our ultra post kits or 4"x4" posts with post sleeves are building code compliant. The complete post kit with standard post mount can only be installed in applications that are less than 30" above ground.

Fypon has received confirmation from ICC Evaluation Service, LLC (ICC-ES), that its QuickRail synthetic railing systems comply with the provisions of the International Building Code and International Residential Code. The ICC-ES confirmation, published in evaluation report ESR-2601, will help code officials approve use of QuickRail systems under the codes. The Fypon evaluation report is available online at www.icc-es.org.

QuickRail® Railing Kits

Options & Features

- Height Options: 36" or 42" guardrail height
- Length Options: 6', 8', 10' or 12' nominal length
- Spindle Options: Colonial, square or glass
- Finish Color: White (standard) or tan (special order)
- Application: Straight or stair (30°-40° slope)
- Additional Accessories: Multi-angle brackets, 45° adapters and curved adapters are available as special order
- Conveniently packaged in one box, each kit includes a top rail, a bottom rail, spindles, brackets, bracket covers, a crush block, structural insert* and screws

Kit Contents

Straight & Stair Rail Kits

Each straight or stair rail kit includes the following:

- Deluxe Top Rail
- Top Rail Structural Insert (Not Included in 6' Kits)
- Colonial, Square or Glass Spindles
- Bottom Rail
- Crush Block
- Brackets & Bracket Covers
- Screw Pack

Finish Colors

QuickRail products come in our vibrant white or tan UV-protected finish.

System Accessories

Post Sleeves & Accessories

The post sleeve is a one-piece, hollow design that slides over an existing 4"x4" or 5"x5" support post. Post sleeves can be accented with a variety of caps and bases to customize your system.

^ Not compatible with complete post kit.

Gate Kits

Gate kits come with a latch, hinges and mounting hardware, and are available in 36" and 42" heights. The gate kit components are pre-cut to fit a 37 1/2" wide opening but can be trimmed for smaller applications. Be sure to check local building codes for any dimension requirements when planning your system layout.

Kit Contents:

- (1) Deluxe Top Rail
- (1) Flat Bottom Rail
- (5) Spindles
(Colonial or Square)
- (2) Post Sleeves
- (2) Taper Caps
- (1) Gate Hardware Kit

IMPORTANT: Gate kit should NOT be attached to complete post kit. It is recommended to attach the gate kit to a structural 4"x4" or 5"x5" treated post covered with a post sleeve.

Description	Spindle Style	Gate Width	Kit Height	White Part Number	Tan Part Number

QuickPost® Synthetic Porch Post

Structural Post with Lifetime Finish

QuickPost® synthetic porch posts are the perfect complement to our QuickRail® systems. Featuring the same lifetime finish as all QuickRail system components, the vibrant color is virtually maintenance-free and never needs to be painted.

- Structural post with steel insert
- Precise colonial detail
- Trim to fit your project
- Designed for use with QuickRail systems
- Virtually maintenance-free
- Limited lifetime warranty^

Product Details

- Shell is composed of UV-protected vinyl
- Internal core includes a structural, galvanized steel tube
- Kit includes mounting plates and screws
- Trim kit available (sold separately)

Product Options

- Sizes: 5" or 6" nominal width
(Actual widths are 4 1/4" or 5 1/4")
- Finish colors: White (standard) or tan (special order)
- Accessories: Trim kit available (sold separately)

Grab Rail Handrail System

Fypon® grab rail perfectly complements all QuickRail® synthetic railing systems. The grab rail system is easy to install and can be mounted to QuickRail® complete post kits (in applications less than 30" above ground) or an existing wall. **IMPORTANT:** The illustration below is intended to show how the system components are used together. Grab rail must be attached to a guard rail in applications above 30".

- Meets ADA requirements
- White UV-protected finish resists fading
- Never needs painting
- Can be used with QuickRail systems
- Virtually maintenance-free
- Limited lifetime warranty[^]

Adhesive & Finishing

A urethane-based adhesive such as Loctite® PL Premium® Construction Adhesive* must be used on all joints when installing urethane products. This will minimize the effects of expansion and contraction on the product. For additional information on adhesives, detailed installation instructions and finishing information, please visit www.fypon.com.

Loctite® PL Premium® Adhesive

Part Number	Description
	ADH1 Loctite PL Premium Adhesive
	(1) 10.2 oz. Cartridge

Considerations for Installation

Fypon reserves the right to make changes to our product with the assurance that we will meet or exceed quality requirements. Changes to product could include standardization across parts that may impact blocking applications, but visual impact will not be noticeable and parts will align. If it is critical to have consistency between parts for installation purposes, please speak with your Customer Service Representative prior to placing your order at 800-446-3040.

Material Comparison	Fypon® Polyurethane	Wood	Composite
May Be Placed Against Masonry	YES	NO	NO
Above-Grade Distance Requirement**	0"	8"	6"
Water Absorption	NO	YES	YES
Insect Resistant	YES	NO	NO
Moisture Resistant	YES	NO	NO
Pre-Drilling Required When Edge Nailing	NO	YES	YES
Requires Sanding, Priming & Sealing	NO	YES	YES
Painting (Number of Coats Needed)***	1	2	2
Quality	Consistent quality, no waste; consistent finish	Natural variation; must be culled	
Versatility**	Suitable options for interior or exterior application	Different grade of material and finish required for outdoor use	

* Marks denoted by (*) asterisk are owned by third parties.

· Loctite® PL Premium® is owned by Henkel Corporation.

· Sherwin-Williams is owned by Sherwin-Williams Company.

** Always consult the local building code authority to determine suitability of products to meet specific requirements, as well as adhesive manufacturer's recommendations for your particular climate and the substrate you are installing to.

*** Fypon product should be painted within 60 days of installation.

Finishing Touches

Primer Color Match Available at Sherwin-Williams

To better service our customers nationwide, we have worked with Sherwin-Williams® to formulate a color and sheen match for our factory-applied primer.

Fypon® White:

Resilience™ Exterior Latex
 Product # K42W51
 Sheen: Flat
 Base: Extra White
 No colorant needs to be added to the formula.

Fypon® Oatmeal:

Resilience™ Exterior Latex
 Product # K43W53
 Sheen: Satin
 Base: Deep Base
 Quart and gallon formulas are shown below.

Quart Formula

W1 – White 4/32, 1/64
 B1 – Black 7/32, 1/64, 1/128
 R2 – Maroon 4/32
 Y3 – Deep Gold 15/32, 1/64, 1/128

Gallon Formula

W1 – White 18/32
 B1 – Black 31/32, 1/128
 R2 – Maroon 15/32, 1/64
 Y3 – Deep Gold 63/32
